DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR §1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the moving mechanism of claims 27 and 29 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15-20 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Hubble, III, et al. (US 4,553,033). The patent discloses recording medium 12, light source 82, image sensing device 88, and irradiation lens 74 and imaging lens 76, formed integrally and of the same material as shown in Figure 3.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2852

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 24 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hubble, III, et al. in view of Fujioka et al. Hubble, III et al., discussed above, differs from the claimed invention in not forming a color image. Fujioka et al. discloses light source 100, irradiating lens 102, imaging lens 104, light receiving means 106, and differs from the claimed invention in not disclosing the irradiating lens and imaging lens being integrally formed. It would have been obvious to one of ordinary skill in the art at the time the invention was made to integrally form the irradiating lens and imaging lens of Fujioka et al. for easy installation and alignment as taught by Hubble, III et al., column 1.

Allowable Subject Matter

Claims 1-14 and 27-30 are allowed.

Claims 21-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed October 15, 2002, have been fully considered but they are not persuasive. Applicant's argument that Hubble, III et al. does not disclose a lens with a flat side toward the recording medium is considered to be incorrect. See Figure 3 wherein lens 74 has a

Art Unit: 2852

flat side, the side pointed to by the lead line from reference character 74, toward the recording medium 12.

Other Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ishikawa et al. (US 6,310,689 B1) discloses an image sensing device having an integrally formed irradiation lens and an imaging lens integrally formed and flat on one side.

Final Rejection

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
